Hakko-kogaku Zasshi
(Journal of Fermentation Technology)

Contents of Vol. 48, No. 10 (1970)

Originals

Physiological and Biochemical Studies on *Saccharomyces sake*
  (XIII) Decreases of the Respiratory and Fermenting Activities of *Saccharomyces sake*
  Cultured in a Lactic Acid-Containing Medium under Anaerobic Conditions
  ..............................................................K. Sumino, Y. Tani and S. Fukui...(587)

Physiological and Biochemical Studies on *Saccharomyces sake*
  (XIV) Protecting Action of Some Sugars against the Decreases of Respiratory and
  Fermenting Activities of *Saccharomyces sake* Soaked in Lactic Acid
  ..............................................................K. Sumino, Y. Tani and S. Fukui...(594)

Isoamylase Production by *Aerobacter aerogenes*
  (II) Some Quantitative Results by Batch Culture
  ..............................................................Y. Fujio, M. Sambuichi and S. Ueda...(601)

Purification and Properties of Two Cellulase Components Obtained from *Irpex lacteus*
  (*Porphyra tuliiferae*)
  ..............................................................T. Kanda, K. Wakabayashi and K. Nisizawa...(607)

Utilization of Diethyl Pyrocatechol in Alcoholic Beverage Making
  (III) Determination of Diethyl Carbonate in Alcoholic Beverages
  ..............................................................S. Hara, H. Murakami, K. Marukawa, Y. Amata and I. Sakakura...(616)

Studies on Sediment of Shoyu
  (III) Effect of Adsorbents and Precipitants on Prevention of Secondary Sediment
  of Shoyu
  ..............................................................H. Hashimoto, H. Yoshida and T. Yokotsuka...(622)

Studies on Sediment of Shoyu
  (IV) Precursor of Secondary Sediment of Shoyu
  ..............................................................H. Hashimoto, H. Yoshida and T. Yokotsuka...(628)

Antimicrobial Activity of Quarternary Ammonium Bromide
  ..............................................................H. Korai and K. Takeichi...(635)

Review

Concentration of Natural Products from Dilute Crude Solution
  ..............................................................Y. Takino...(641)

Article

International Organizations Co-operating in the Field of Fermentation Technology
  ..............................................................G. Terui...(650)

The Society of Fermentation Technology, Japan
  Faculty of Engineering, Osaka University, Yamada Kami, Suita,
  Osaka, Japan
