Equality-evaluation of Wakan-yaku (Japanese-Chinese traditional medicines) with liquid chromatography-mass spectrometry (LC-MS): comparison of constituents of original plants for Chinese traditional medicine “Dan-shen (Tan-jin)”
Yasuhiro TEZUKA ................................................................. 39

Effect of Cnidii Rhizoma (Senkyu) on triphasic skin response in passively sensitized mice
Eiichi TAHARA ................................................................. 48

Originals
Transformation of shikonin by a cell-free extract of Eubacterium sp. A-44, a human intestinal bacterium
Meselhy R. MESELHY, Eri NISHIMOTO, Teruaki AKAO and
Masao HATTORI ................................................................. 58

Effects of Ninjin-yoei-to (Rensheng-Yangrong-Tang), a Kampo medicine, on brain monoamine and nerve growth factor contents in mice with olfactory bulb lesions
Qing-Hua SONG, Kazuo TORIIZUKA, Koji HJIMA, Kako WATANABE and
Jong-Chol CYONG ............................................................. 64

Cholinergic involvement in the improving effects of Yoku-kan-san-ka-chimpi-hange (Yi-Gan-San-Jia-Chen-Pi-Ban-Xia) on the disruption of spatial cognition and the electroconvulsive shock-induced immobilization
Nobuaki EGASHIRA, Kenichi MISHIMA, Kouji KURAUCHI, Katsunori IWASAKI,
Yoshiaki MATSUMOTO and Michihiro FUJIIWARA .......................... 71

Antidiabetic effects of Kampo medicines in a non-insulin-dependent diabetes mellitus model using KK-Ay mice
Masae OKUMURA, Kunihiko SUZUKI, Keisuke YAMURA, Masao UCHIYAMA,
Sadao NAKAYAMA and Katsuji OGUCHI ..................................... 81

Role of the component crude drugs of Mao-bushi-saishin-to on the primary immune response in mice
Natsumi HIGASHI, Yasuhiro TAKAGI and Noboru UEBA ......................... 89
