

ClassNK TECHNICAL BULLETIN

Vol. 26 2008

CONTENTS

Invitation Paper

On the Design of Fittings and Dynamic Behaviors of Ships in Waves

Yoshiyuki Inoue 1

Technical Papers

A study of a Fatigue Management System for LNG Carriers using a New Fatigue Damage Sensor

Norio Yamamoto, Toshiro Koiwa, Hirotsugu Dobashi, Osamu Muragishi, and Yukichi Takaoka 9

A new method for strength evaluation of propulsion shafting coupling bolts based on the actual failure mode

Yuzhong Song and Tsuyoshi Nabeya 21

Trial application of FE simulation on ships collision within the risk assessment on oil spills from oil tankers

Toshiro Arima, Susumu Harada, M. Abdul Rahim, and Yoshimi Uraguchi 29

Development of ISUM element to represent collapse behavior of girder structure and its application to the collapse analysis of double bottom structures

Kinya Ishibashi 35

A CIP-Based Cartesian Grid Method for Nonlinear Wave-Body Interactions

Masashi Kashiwagi, Changhong Hu, Ryuji Miyake, and Tingyao Zhu 51

Technical Reports

“Guidelines on Pipe Wall Thinning-Taking into Account Flow Accelerated Corrosion of Water and Wet Steam Pipelines in Ships-” Published

Research Institute 61

“Guidance for Measures to Cope with Degraded Marine Heavy Fuels, Version II -Taking into Account the Poor Combustibility of Fuels -” Published

Research Institute 63

Guidelines on the Application of YP47 Steel for Hull Structures of Large Container Carriers

Material and Equipment Department 65

Guidelines for Performance Standard for Protective Coatings contained in IMO Resolution MSC.215(82)

Survey Department and Development Department 69

List of NK Publications 73
