## The Occurrence of *Ibalia takachihoi* YASUMATSU (Hymenoptera, Ibalidae) in Honshu, Japan

Yoshihisa ABE

Laboratory of Entomology, Faculty of Agriculture,  
Kyoto Prefectural University, Kyoto, 606 Japan

Key words: Hymenoptera; *Ibalia takachihoi*; distribution; Honshu.

*Ibalia takachihoi* YASUMATSU is known as an important parasitoid of a siricid, *Tremex longicollis* KONOW (YASUMATSU, 1943). Until now, this parasitoid has been recorded in Kyushu, Japan. Recently, I had an opportunity to examine a female specimen of *I. takachihoi*, collected by Dr. T. KIMURA, at Kitashirakawa-nishimati, Kyoto, on May 22, 1939. This is the first record of the occurrence of this wasp in Honshu.

I thank Dr. T. KIMURA for the gift of the specimen.
