## 2. The definition of survey items

### Product

#### ① Production

The quantity of products actually produced (including produced as a consignee) by the establishment that is the object

of 'the survey (hereafter, 'the survey object'). However, 'products in process' shall be excluded.

Besides, 'Production' includes products as process goods or for consumption for other products in 'the survey object'.

**(Production value)**

Value as evaluated by the contract price or producer's selling price

In this case, 'contract price' or 'producer's selling price' are the enterprise's selling prices excluding shipping charges, transport costs, insurance costs and other costs, and including consumption tax.

**② Reception**

The quantity of products received by the factories or warehouses of 'the survey object' that produces the same survey commodity items due to the following circumstances:

- a. Purchase from other enterprises (including imports)
- b. Reception from other factories belonging to the same enterprise
- c. The commissioned products and commission-manufactured products received from the consignees (including subcontracted factories)
- d. Returned products

**③ Consumption**

The quantity of products consumed as materials, process goods in 'the survey object'

**④ Shipment**

The quantity of products actually shipped from 'the survey object's' warehouse or rental warehouse which 'the survey object' mainly uses

Besides, the quantity of products is distinguished as 'Sales' or 'Other' in the following ways:

**(Sales)**

- a. Products directly sold to distributors or other consumer enterprises
- b. Products shipped to the headquarters/sales offices or relay points for the purpose of selling
- c. Commissioned products shipped to consigners that are sales dealers (including consumers)
- d. Products shipped to other factories of the same enterprise which are not producing the same survey commodity

**(Other)**

- a. Products shipped to other factories of the same enterprise which are producing the same products as the survey commodity
- b. Products shipped to other factories of the same enterprise as materials
- c. Products shipped as materials for use in the commissioned products or commission-manufactured products
- d. The commissioned products or commission-manufactured products shipped to the manufacturers (consigners) that are producing the same survey commodity
- e. Products used in-house (equipment investment for an enterprise's own factory, use for samples, use for gifts, use in testing and research)
- f. Products consumed in-house (only in the case of the no consumption survey item)

**(Sales Value)**

Value as evaluated by the contract price or producer's selling price

In this case, 'contract price' or 'producer's selling price' are the enterprise's selling prices excluding shipping charges, transport costs, insurance costs and other costs, and including consumption tax.

**⑤ Inventory at the end of the month**

The quantity of products produced or received by 'the survey object' which are actually stored in 'the survey object's' warehouses and rental warehouses which 'the survey object' mainly uses

(2) Figures may not exactly equal totals because of rounding.

(3) When reprinting the statistics contained in this monthly report in other printed matter, the fact that they are based on the "Monthly Report of Iron and Steel, Non-ferrous Metals, and Fabricated Metals Statistics" must be clearly indicated.

(4) Because of the review of the scopes, there may be discontinuity for some consecutive data of the commodity. Please refer to 'Continuity Coefficients by Commodity' (page112) for details.

The '\*' mark in 'III. Historical Data by Principal Commodities' indicates that the calculation of the year-to-year percentage of the survey commodity is done using connecting coefficients.

注: その他の特殊用途鋼には耐熱鋼、高マンガン鋼が含まれる。なお、平成19年よりステンレス鋼の定義変更に伴い耐熱鋼の一部がステンレス鋼に移動したため、平成18年以前は不連続となっている。

Note: Other Steel for Special Purposes includes heat-resisting and high-manganese steel. In addition, because classifications for steel categories changed in 2007 and some categories of heat-resisting steel have been moved to the Stainless Steel category, this category has been discontinued since 2006.

注: 1. 本表は現行の鉄鋼月報で調査している熱間、冷間、めっきの工程別調査を商慣習として広く用いられている完成鋼材に組み替えたものである。

注: 2. 組み替えの方法は熱間圧延鋼材(管材、鋼帯幅600mm以上冷延電気鋼帯用を除く。)、冷間圧延鋼材及びめっき鋼材(磨床鋼及び線鋼を除く。)、鋼管及び冷間ロール成型形鋼を加えたものから重複生産を調整するため、熱間、冷間及びめっきの各工程における鋼材次工程の消費量を差し引いて算出する。

Note: 1. This table is a rearrangement of the present Iron and Steel Monthly Report research classified by the processes of hot rolling, cold rolling and plating into categories of complete steel products commonly used in business.

2. The rearranged method is to add the following together: hot-rolled steel products (excluding pipe materials, and products to be used for cold-rolled electric steel strip with strip-width of 600 mm or more), cold-finished steel products, plated steel products (excluding abraded bar steel and wires), steel pipes and cold-rolled molding section steel, and then to adjust overlap of production and subtract the amounts of consumption in each of the subsequent hot-rolled, cold-rolled and plated steel processes.

 Note: Other Steel for Special Purposes includes heat-resisting and high-manganese steel. In addition, because classifications for steel categories changed in 2007, and some categories of heat-resisting steel have been moved to the Stainless Steel category this category has been discontinued since 2006.

## VI. 品目別接続係数について

対象事業所の見直し等に伴い、当年と前年の数値をそのまま比較できない品目があります。

下記の品目について、前年同月比を求める場合は、接続係数を前年の数値に乗じて計算してください。

また、複数月で接続係数がある品目については、その月の係数とその月以前の係数とを掛け合わせて計算してください。

平成19年12月以前の数値を使用して前年同月比を求める場合は、下記の係数を前の数値に乗じて計算してください。
