

APOC : Then and Now

The 3rd APOC

(Taipei Nov., 1998)

James Ying-Kwei Tseng
President of the 3rd APOC

Orthodontists are rendering more and more adult treatment in the Asian-Pacific region simply because orthodontic treatment was not readily available in many areas of Asia when current Asian adults were children. The themes of 3rd APOC are "Adult Orthodontics" and "Scientific Basis of Clinical Orthodontics". There will be a golf tournament and optional tours to offer other than academic program. Moreover, we also provide friendly host for first comer, welcome party at the city hall and a "Asian Night" gala dinner during the conference.

You will enjoy the Chinese heritage of today's Taiwan and exquisite Oriental cuisine with the "Hod Da-La" spirit. All presentations will be delivered in English with simultaneous interpretation into Japanese.

The organizing committee is actively soliciting papers, table clinics and posters from all over the world. We sincerely invite you to send in papers of your recent clinical research to the 3rd APOC no later than June 30 and join us in this great event.
