

Acknowledgment of Reviewers, 2002

Shigeyuki MAYAMA
Editor-in-chief,
Journal of General Plant Pathology

The success of Journal of General Plant Pathology largely depends on the quality of manuscripts submitted by authors, on the careful review by associate editors, and on the elaborate proofreading by editorial managers. A special and sincere appreciation is given to Dr. Beth E. Hazen, U.S.A., for her great efforts to correct the English in the manuscripts. In addition to the associate editors, editorial managers, the reviewers listed below provided constructive critical reviews of at least one manuscript during the year of 2002. Their names are published here in grateful appreciation of their significant contribution to the journal, as well as to the development of plant pathology.
