

The 4th Symposium on Deep-sea Research
Using the Submersible "SHINKAI 2000" System

September 1988

CONTENTS

1. Igneous and Sedimentary Rocks on the NW Flank of the Yamato Tai in the Sea of Japan, observed and collected by the Submersible "SHINKAI 2000"	1
Kazuo KOBAYASHI	
2. Geology of the Toyama Trough off the Noto Peninsula, Central Japan as observed from DSRV "SHINKAI 2000".	9
Haruo YAMAZAKI	
3. Results of a Dive Study at the Eastern Foot of the Okushiri Ridge on the Eastern Margin of the Sea of Japan.	25
Makoto YAMANO, Takeo TANAKA and Hiroyasu MOMMA	
4. Distribution of the Firefly Squid, <i>Watasenia scintillans</i> (BERRY), in the Toyama Bay, the Sea of Japan.	37
Seishi HAYASHI	
5. An Ecological Survey of Deep-sea Animal Community on the Muddy Flat Bottom of the Mogami Trough. — Report on Dive 247 of the "SHINKAI 2000" —	41
Hitoshi SANDO	
6. Surveys on the Behavior of <i>Arctoscopus japonicus</i> in the Deep Sea.	53
Yoshio SATO	
7. Observation of Marine Environment and Distribution of Organisms in the Matsumae Caldron.	59
Toshiaki WAKUTSUBO	
8. Submarine Topography, Geology and Tectonic Movement in the Northern Part of the Suruga Trough.	67
Haruo YAMAZAKI and Shigeru KATO	
9. No. 308 Dive at the Senoumi Gorge.	83
Toshio FURUTA	
10. Geology of the Axial Part of the Suruga Trough — Diving Survey Reports of the Submersible "SHINKAI 2000", Dive No. 309 —	89
Hiroshi KITAZATO	
11. Measurement of the Deep-sea Current near the Bottom in the Suruga Trough.	101
Koki MIDORIKAWA, Hiroyasu MOMMA, Kyohiko MITSUZAWA and Hiroshi HOTTA	
12. Observation on the Behavior of some Deep-sea Fishes in the Suruga Bay using the Submersible "SHINKAI 2000".	111
Sho TANAKA and Tadashi KUBOTA	
13. Ecological Observation of <i>Sergia lucens</i> and Other Deep-sea Organisms at 190–375m Depth in the West area of the Suruga Bay.	119
Fumio MURANAKA	
14. A Submersible Study of Hydrothermal Field at the Kaikata Seamount, Izu-Ogasawara Arc.	129
Makoto YUASA, Tetsuro URABE and Fumitoshi MURAKAMI	
15. Submarine Topographical and Geological Survey in Habu Spur southeast of the Izu Oshima Island	141
Katsuhiro KUSUNOKI and Shinichi KIKUCHI	
16. Subaqueous Basaltic Lava Flow at the Sagami Bay.	149
Tadahide UI, Shigeo ARAMAKI and Yasuyuki MIYAKE	
17. A Submarine Lava Flow in the Western Part of the Sagami Bay, northeast off Atagawa (II).	157
Jiro NAKA, Takeo TANAKA and Hiroshi HOTTA	
18. Searching for Biological Communities at the Okinoyama Bank Site, the Sagami Bay.	177
Jun HASHIMOTO, Seiji MATSUZAWA and Hiroshi HOTTA	
19. Geological Study with the "SHINKAI 2000" in the West Sagami Bay including <i>Calypptogena</i> Colonies.	189
Teruaki ISHII, Masaharu WATANABE, Toshio ISHIZUKA, Suguru OHTA, Hitoshi SAKAI, Hiroshi HARAMURA, Naotatsu SHIKAZONO, Kazuya TOGASHI, Yoshitaka MINAI, Takeshi TOMINAGA, Kiyotaka CHINZEI, Masuoki HORIKOSHI and Eiji MATSUMOTO	

20. A γ -ray Spectral Survey on Giant Clam (*Calyptogena soyoeae*) Colonies using the Submersible "SHINKAI 2000" (II). 219
Norio YOSHIDA and Hiroaki TSUKAHARA

21. Trace Element Composition of *Calyptogena soyoeae* from a Giant Clam Colony off Hatsushima Island, Sagami Bay, Japan. 225
Toshiyuki MASUZAWA, Nobuhiko HANDA and Mutsuo KOYAMA

22. Respiration Rate of *Calyptogena soyoeae* obtained from the *Calyptogena* Communities at the Hatsushima site. 233
Isao KOIKE, Yoshihisa SHIRAYAMA, Toshitaka GAMO and Hitoshi SAKAI

23. Parasitic Animals collected in a *Calyptogena*-dominant Community developing off the Hatsushima, the Sagami Bay. 239
Tomoyuki MIURA

24. Examination of the Deep Sea Crustaceans Research Method. 245
Fumio ITO

25. Observation of an Ocean Bottom Station installed in the Sagami Bay and Replacement of the Acoustic Transponder attached to it. 251
Jiro SEGAWA and Hiromi FUJIMOTO

26. The Ocean-bottom Seismograph installed on Hard Rock by the "SHINKAI 2000". 259
Tomoki TSUTSUI, Masataka ANDO and Satoshi KANESHIMA

27. A Dive List using the Submersible "SHINKAI 2000" (after 1985). 267
